

PAINT BUCKET/APRON COMBINATION

ABSTRACT OF THE DISCLOSURE

A paint bucket is disclosed held within a pocket formed in an apron disposed at the front of a user, such paint bucket having a semicircular front portion and a substantially flat bottom and rear portion with the top of the semicircular front portion curving downward to meet the top of the rear portion and having an inwardly disposed planar lip member extending rearward from the inside of the semicircular front portion, defining a paint receipt opening between the planar lip member and the rear portion.
